

Telecom Customer Churn — Insight Summary

Key Metrics

Metric	Value
Total Customers	7043
Churned Customers	1858
Overall Churn Rate	26.38%
Top Churn Reason	Price too high
Top Churn Reason Count	369

Key Insights

- The dataset contains 7,043 customers, with 1,858 customers classified as churned.
- The overall churn rate is 26.38%.
- The most frequently reported churn reason is 'Price too high', with 369 customers.
- Contract type, internet service, payment method, tenure, and customer support-related services were analyzed to identify differences in churn rates.
- Monthly Charges and Total Charges were examined using boxplots, while numerical variables were analyzed using correlation analysis.
- Outlier analysis identified a small number of observations in MonthlyCharges and TotalCharges. These observations were retained because they may represent genuine customer behavior.

Conclusion: The EDA provides an overview of customer churn patterns, churn reasons, customer characteristics, service usage, and numerical relationships within the telecom dataset.
