

Q1. Top 5 Spending Customers

SQL Query-

```
SELECT
    `Customer ID`,
    `Customer Name`,
    SUM(Sales) AS Total_Spending
FROM superstore
GROUP BY `Customer ID`, `Customer Name`
ORDER BY Total_Spending DESC
LIMIT 5;
```

Output-

	Customer ID	Customer Name	Total_Spending
▶	SM-20320	Sean Miller	25043.05
	TC-20980	Tamara Chand	19052.22
	RB-19360	Raymond Buch	15117.34
	TA-21385	Tom Ashbrook	14595.62
	AB-10105	Adrian Barton	14473.57

Explanation-

- **SELECT** selects the Customer ID, Customer Name, and total spending.
- **SUM(Sales)** calculates the total sales amount spent by each customer.
- **GROUP BY** groups all transactions belonging to the same customer.
- **ORDER BY Total_Spending DESC** sorts customers from highest to lowest spending.
- **LIMIT 5** displays only the top 5 spending customers.

Insight

The query identifies the **five customers who generated the highest total sales value**. Sean Miller has the highest total spending among the customers shown.

Q2: Total Sales by Region.

SQL Query-

```
SELECT
    `Region`,
    ROUND(SUM(Sales), 2) AS Total_Sales
```

```
FROM superstore  
GROUP BY `Region`;
```

Output-

	Region	Total_Sales
▶	South	391721.91
	West	725457.82
	Central	501239.89
	East	678781.24

Explanation-

- **SELECT Region** selects each sales region.
- **SUM(Sales)** calculates the total sales for each region.
- **ROUND(..., 2)** rounds the sales amount to 2 decimal places.
- **GROUP BY Region** groups all sales transactions according to their region.

Insight

This query shows the **total sales generated by each region**, allowing comparison of regional sales performance.

Q3. Average Order Size

SQL Query-

```
SQL SELECT  
    ROUND(SUM(Sales) / COUNT(DISTINCT `Order ID`), 2) AS Average_Order_Size  
FROM superstore;
```

Output-

	Average_Order_Size
▶	458.61

Explanation-

- **SUM(Sales)** calculates the total sales.
- **COUNT(DISTINCT Order ID)** counts the number of unique orders.
- **SUM(Sales) / COUNT(DISTINCT Order ID)** calculates the average sales value per order.
- **ROUND(..., 2)** rounds the result to 2 decimal places.

Insight-

The query calculates the average sales value for each unique order.

Q4. Total Sales

SQL Query-

```
SELECT  
    ROUND(SUM(Sales), 2) AS Total_Sales  
FROM superstore;
```

Output-

	Total_Sales
▶	2297200.86

Explanation-

- **SELECT** selects the total sales.
- **SUM(Sales)** calculates the total sales from all records.
- **ROUND(..., 2)** rounds the result to 2 decimal places.

Insight-

The query calculates the total sales generated from all transactions.

Q5. Total Profit

SQL Query-

```
SELECT  
    ROUND(SUM(Profit), 2) AS Total_Profit  
FROM superstore;
```

Output-

	Total_Profit
▶	286397.02

Explanation-

- **SELECT** selects the total profit.
- **SUM(Profit)** calculates the total profit from all records.
- **ROUND(..., 2)** rounds the result to 2 decimal places.

Insight-

The query calculates the total profit generated from all transactions.

Q6. Number of Orders

SQL Query-

```
SELECT  
    COUNT(DISTINCT `Order ID`) AS Total_Orders  
FROM superstore;
```

Output-

	Total_Orders
▶	5009

Explanation-

- **SELECT** selects the total number of orders.
- **COUNT(DISTINCT Order ID)** counts each unique order only once.

Insight-

The query calculates the total number of unique orders in the dataset.

Q7. Sales by Category

SQL Query-

```
SELECT  
    `Category`,  
    ROUND(SUM(Sales), 2) AS Total_Sales  
FROM superstore  
GROUP BY `Category`;
```

Output-

	Category	Total_Sales
▶	Furniture	741999.8
	Office Supplies	719047.03
	Technology	836154.03

Explanation

- **SELECT** selects the Category and Total Sales.

- **SUM(Sales)** calculates total sales for each category.
- **ROUND(..., 2)** rounds the result to 2 decimal places.
- **GROUP BY** groups sales according to each category.

Insight-

The query shows the total sales generated by each product category.

Q8. Profit by Region

SQL Query-

```
SELECT
    `Region`,
    ROUND(SUM(Profit), 2) AS Total_Profit
FROM superstore
GROUP BY `Region`;
```

Output-

	Region	Total_Profit
▶	South	46749.43
	West	108418.45
	Central	39706.36
	East	91522.78

Explanation-

- **SELECT** selects the Region and Total Profit.
- **SUM(Profit)** calculates total profit for each region.
- **ROUND(..., 2)** rounds the result to 2 decimal places.
- **GROUP BY** groups profit according to each region.

Insight-

The query shows the total profit generated by each region.

Q9. Top 10 Products by Sales

SQL Query-

```
SELECT
    `Product ID`,
    `Product Name`,
```

```

ROUND(SUM(Sales), 2) AS Total_Sales

FROM superstore

GROUP BY `Product ID`, `Product Name`

ORDER BY Total_Sales DESC

LIMIT 10;

```

Output-

	Product ID	Product Name	Total_Sales
▶	TEC-CO-10004722	Canon imageCLASS 2200 Advanced Copier	61599.82
	OFF-BI-10003527	Fellowes PB500 Electric Punch Plastic Comb Bind...	27453.38
	TEC-MA-10002412	Cisco TelePresence System EX90 Videoconferen...	22638.48
	FUR-CH-10002024	HON 5400 Series Task Chairs for Big and Tall	21870.58
	OFF-BI-10001359	GBC DocuBind TL300 Electric Binding System	19823.48
	OFF-BI-10000545	GBC Ibimaster 500 Manual ProClick Binding System	19024.5
	TEC-CO-10001449	Hewlett Packard LaserJet 3310 Copier	18839.69
	TEC-MA-10001127	HP Designjet T520 Inkjet Large Format Printer ~...	18374.9
	OFF-BI-10004995	GBC DocuBind P400 Electric Binding System	17965.07
	OFF-SU-10000151	High Speed Automatic Electric Letter Opener	17030.31

Explanation-

- **SELECT** selects Product ID, Product Name, and Total Sales.
- **SUM(Sales)** calculates total sales for each product.
- **GROUP BY** groups sales by product.
- **ORDER BY DESC** sorts products from highest to lowest sales.
- **LIMIT 10** displays the top 10 products.

Insight-

The query identifies the top 10 products based on total sales.

Q10. Customers with Highest Total Profit

SQL Query-

```

SELECT

`Customer ID`,

`Customer Name`,

ROUND(SUM(Profit), 2) AS Total_Profit

FROM superstore

GROUP BY `Customer ID`, `Customer Name`

```

ORDER BY Total_Profit DESC

LIMIT 10;

Output-

	Customer ID	Customer Name	Total_Profit
▶	TC-20980	Tamara Chand	8981.32
	RB-19360	Raymond Buch	6976.1
	SC-20095	Sanjit Chand	5757.41
	HL-15040	Hunter Lopez	5622.43
	AB-10105	Adrian Barton	5444.81
	TA-21385	Tom Ashbrook	4703.79
	CM-12385	Christopher Martinez	3899.89
	KD-16495	Keith Dawkins	3038.63
	AR-10540	Andy Reiter	2884.62
	DR-12940	Daniel Raglin	2869.08

Explanation-

- **SELECT** selects Customer ID, Customer Name, and Total Profit.
- **SUM(Profit)** calculates total profit generated by each customer.
- **GROUP BY** groups transactions by customer.
- **ORDER BY DESC** sorts customers from highest to lowest profit.
- **LIMIT 10** displays the top 10 customers.

Insight-

The query identifies the customers who generated the highest total profit.
